Notice

Dear 6th Semester Students,

Regarding the project work, very regret to say that some students are being careless and it seems they are not taking good care over their career. They are not taking project work seriously on top of that they neither pay attention to the guide's instructions nor they stay connected to their guide to acquire knowledge on original and aesthetic presentation of project work, the vital part of course curriculum. Bear in mind such students may struggle hard to pass the examination and suffer year back following their negligent attitude on project work.

In this regard, they have been told several times. Once again they are being advised to take the project work seriously and complete it wholeheartedly with utter perfection and submit it to College, as instructed.

On the other, College is very pleased to say that majority of students are doing enough study on project. They follow guide instructions in their letter and spirit and dedicated to submitting it on time and in best way.

Here goes the list of non-serious students, given under the table below as guides said.
