## Principal's desk

"Challenges do not break us, they actually make us".

Be ready to face the challenges with your most endurance. Each step is a challenge. A child encounters challenges with its very first step of walking, and the struggling continues. Human life is not a bed of roses. With every prick, he becomes stronger to meet the hardships of life.

## Editor's desk

We don't grow when things are easy. We grow when life feels and accepts challenges. These challenges develop our hidden potentials and help us to enhance our skills.

Our Sport Department builds up students to face the challenges of life and to embrace the consequences with a daring heart. We are not only nurturing sports personalities but also believe in creating a complete individual for a better future.

## 2016 TRANSIT OF MERCURY

On Monday, 2016 May 09, Mercury transitted the Sun for the first time since 2006. The transit or passage of a planet across the face of the Sun is a relatively rare occurrence. As seen from Earth, only transits of Mercury and Venus are possible. There are approximately 13 transits of Mercury each century. In comparison, transits of Venus occur in pairs with more than a century separating each pair.

The principal events occurring during a transit are conveniently characterized by contacts, analogous to the contacts of an annular solar eclipse.
